December 2026 Release

1. New Features in Minitab Solution Center 1
2. New Feature in Minitab® Statistical Software 1
3. Problems Resolved in Minitab® Statistical Software 1
4. New Features in Minitab Data Center 2
5. New Feature in Minitab Dashboards 2

1. New Features in Minitab Solution Center

Access Education Hub from Minitab Solution Center

The Minitab Solution Center landing page now includes a link to Minitab Education Hub™, where you can access training available through your Education Hub subscription.

Share Files with Related Resources

Share Minitab files and supported related resources with other Minitab Solution Center license holders so collaborators can view or edit your work and refresh data connections.

2. New Feature in Minitab® Statistical Software

Brushing for Diagnostic control charts

You can use graph brushing in P Chart Diagnostic and U Chart Diagnostic to more easily investigate your data.

3. Problems Resolved in Minitab® Statistical Software

- Persistent error prevents users from changing tabs to fix the error condition in control chart dialogs. (398450)
- Update results does not automatically remain enabled after saving and reopening a project. (399775)
- Syntax issues cause Expanded Gage R&R Study to generate extra terms. (396512)

4. New Features in Minitab Data Center

Identify and Address Data Quality Issues Early

The Preview dialog for Minitab® Statistical Software and Minitab Dashboards now displays automatic checks for missing values, outliers, and rare categories when you upload data or open it from a repository to create a data connection. The dialog also provides quick access to clean and transform functionality.

5. New Feature in Minitab Dashboards

Minitab Simul8® Animation in Dashboards

Explore how your process behaves over time with animated Minitab Simul8® models in Minitab Dashboards. Run, pause, and reset simulations while viewing updated charts, KPIs, and simulated time to identify queues and bottlenecks and share insights with stakeholders.
