

Minitab Simul8® 33.3

New Features

Share simulation results with Minitab Dashboards

Create a simulation in Minitab Simul8, then share the results with Minitab Dashboards. Automatically generate an interactive dashboard or build your own. Customize and share your dashboard to communicate findings, collect feedback, and let stakeholders update simulation scenarios and input data.

Problems Resolved

The following issues are resolved in Minitab Simul8 33.3.

- Scenario manager trials now run as expected when the routing arrow density feature is enabled. (396966)
- Improved performance when exporting excessively large models to PDF. (386788)
- Resolved an issue that could cause an unexpected error after repeatedly moving a routing arrow handle. (387175)
- Object results graphs and on-screen charts now appear in the Simul8 Educational version. (370093/391667)
- Fixed an issue that could cause a simulation error when work item completion times changed within an activity after a breakdown and repair. (391745)

Known Problems and Workarounds

Minitab Simul8 33.3 has the following known issue.

- Commas in object names are incorrectly treated as column delimiters when transaction log CSV files are loaded into a spreadsheet. (373236)

WORKAROUND: Before creating a transaction log, remove commas from object names or replace them with a different character, such as an underscore.
